**With special guest,
Andrea Kerton**

Advocate and mother of meningitis B survivor

Learning Objectives

This session will:

- Discuss the perception and status of recommended unfunded vaccines in Canada, focusing on Meningitis B as a case study
- Present an overview of invasive meningococcal disease (IMD) surveillance data including recent epidemiology, disease burden and sequelae, gaps and opportunities
- Look at the recent evolution of regional recommendations with an emphasis on the post-secondary space and the future of IMD prevention
